

Important Galaxy Screenshots

Imported whole genome sequence fasta file of *Vulpes vulpes*

Assembly statistics result

Computing sequence length

Galaxy interface showing a dataset named "11: Vulpes_vulpes_filtered_10kb.fasta". The dataset is 2.4 GB and contains 287 sequences. The left sidebar shows various tools like FASTA/FASTQ, SAM/BAM, BED, VCF/BCF, and Nucleotide. The right sidebar shows a history of operations, including "Genome_Exploration_II_Martinez_Vulpes_vulpes" and "FASTA Statistics on dataset 11: summary stats".

Simple length-filtering experiment

Galaxy interface showing a dataset named "14: NW_027325835.1_sequence.fasta". The dataset is 71.7 KB and contains 1 sequence. The left sidebar shows various tools like FASTA/FASTQ, SAM/BAM, BED, VCF/BCF, and Nucleotide. The right sidebar shows a history of operations, including "Genome_Exploration_II_Martinez_Vulpes_vulpes" and "Compute sequence length on dataset 15".
